

# ESPORLES

## Waste management

**CITIZEN'S GUIDE.** Guide, containing all the rules, waste collection services, and waste management services of the municipality of Esporles.

## Waste collection system in Esporles

Waste collection of the several segmented waste types will be door to door: organic, packaging, glass, paper and cardboard, and non-recyclable waste.

*Non-recyclable waste shall be always taken out in red bag\*.*

## Solid waste generated collection tax

Waste collection tax consists of two items:

1. A fixed amount of 90€, identical for all urban households.
2. An amount of 1 € per red bag used to dispose of non-recyclable waste\*.

Such an amount of one euro pays bag + transport + incineration of the bag contents.

*With this system, those who recycle more will pay less.*

## Solid waste bylaw - Esporles

Esporles counts on a waste bylaw to regulate waste management, enacting the selective waste collection within the municipality, and establishing how and when waste must be taken out, as well as the operation of the Green Dot, all of it aiming to improve sustainability at a local level.

This bylaw also defines offences and penalties as a result of any negative behaviour against the objectives pursued therein.

## Nappies in green bag - 5 days a week

Nappies are allowed to be taken out on any waste collection day; they must be in a green bag provided for free by the City Hall.

Registration at the municipal office required.

## Points of sale of red bag
